A Natural History Of Wine

"Unlike many exploratory books of its kind, written by wine industry pros dabbling in science, A Natural History is authored by two science guys (a molecular biologist and an anthropologist) who just happen to love wine. The two American Museum of Natural History colleagues take readers on a journey that starts at the world's oldest winery, goes deep inside the beverage to the molecular ...

A Natural History of Wine by Ian Tattersall

Being curators at the greatest natural history museum in the world, Tattersall and DeSalle also discuss the many lessons that phylogeny and systematics can teach us about wine as well. The genetic legacy and shared ancestry of the various species and strains of grapes are explored, which provides satisfying insights into the flavors and other properties of each wine grape variety.

A Natural History of Wine - The Human Evolution Blog

A captivating survey of the science of wine and winemaking for anyone who has ever wondered about the magic of the fermented grape. An excellent bottle of wine can be the spark that inspires a brainstorming session. Such was the case for Ian Tattersall and Rob DeSalle, scientists who frequently collaborate on book and museum exhibition projects.

Natural wine refers to a generalized movement among winemakers for production of "natural" wine without pesticides, chemicals and other additives. Historically, it has been connected to the German Lebensreform movement, where it gained popularity in the late 19th and early 20th centuries.. Some sources claim that it started with winemakers in the Beaujolais region of France in the 1960s.

Natural wine - Wikipedia

The two American Museum of Natural History colleagues take readers on a journey that starts at the world's oldest winery, goes deep inside the beverage to the molecular level and explains the phenomenon of drunkenness, busting myths along the way."—Carson Demmond, from Food and Wine's "Best Wine Books of 2015 (and Who to Give Them to)"

A Natural History of Wine: Tattersall, Ian, DeSalle, Rob ...

An extremely engaging explanation of all things wine. Great science, good story telling and read in an engaging manner. I enjoyed learning about the extremely interesting natural history of wine, its makers and the many critters and environmental factors that aid, and hamper wine production.
