Anatomy. Under normal circumstances, the tongue is a pink, muscular organ located within the oral cavity proper. It is kept moist by the products of the major and minor salivary glands, which aids the organ as it facilitates deglutition, speech, and gustatory perception. While there is significant variability in the length of the tongue among individuals, on average, the organ is roughly 10 cm ...

Sarcoplasm is the cytoplasm of a myocyte (muscle fiber, muscle cell). It is comparable to the cytoplasm of other cells, but it contains unusually large amounts of glycogen (a polymer of glucose), myoglobin, a red-colored protein necessary for binding oxygen molecules that diffuse into muscle fibers, and mitochondria. The calcium ion concentration in sarcoplasm is also a special element of the ...

The synovial membrane (also known as the synovial stratum, synovium or stratum synoviale) is a specialized connective tissue that lines the inner surface of capsules of synovial joints and tendon sheath. It makes direct contact with the fibrous membrane on the outside surface and with the synovial fluid lubricant on the inside surface. In contact with the synovial fluid at the tissue surface

Von Haploidie (altgriechisch ἀπλός haplós ‚einfach‘) wird gesprochen, wenn das Genom im Zellkern einer Zelle eines eukaryoten Lebewesens in einfacher Form vorliegt, jedes seiner Gene also nur in einer Variante vorkommt.. Haploid ist beim Menschen typischerweise der Chromosomensatz im Zellkern einer Eizelle oder eines Spermiums. Bei der Befruchtung ergeben die beiden haploiden ...
