Post-Lab Questions 1. State your hypothesis (developed in Step 8) here. Be sure to include what you think the pH will be, and why. My hypothesis is that the water will have a pH of 7 because water is neutral (7). The sodium bicarbonate will have a pH greater than 7 (between 8 and 14) because it is a base. The acetic acid will have a pH less than 7 (between 1 and 6) because it is an acid.

EXPERIMENT 1 NEUTRALIZATION OF ACIDS AND BASES

Infection of the eye and periocular tissue by parasite species is rare. But there are reports of parasitic infections in this area, for example, Loa loa, Onchocerca, and Dirofilaria [1-3].Dirofilaria is a kind of filaria which rarely infects humans as a zoonotic infection [4-8].The life cycle of this parasite is the same as that of other filariae; microfilariae are in the blood of wild and ...
