FWIW, the answer in the comments wrt open is actually incorrect on UNIX-like systems regarding file handle numbers.. If multiprocessing uses fork() (which it does under Linux and similar, although I read there was an issue with forking on macOS), the file handles and everything else are happily copied to child processes (by "happily" I mean it's complicated in many edge cases such as forking ...

Brahman (Sanskrit: ब्रह्म, Hindi: ब्रह्म) connotes the highest Universal Principle, the Ultimate Reality in the universe. In major schools of Hindu philosophy, it is the material, efficient, formal and final cause of all that exists. It is the pervasive, infinite, eternal truth and bliss which does not change, yet is the cause of all changes.
