Environmental Systems & Societies ESS

Environmental Systems and Societies is an introduction to environmental science, which overlaps significantly with the IB Geography syllabus. It is science applied to ideas presented in geography, economics, and TOK. We'll study how different people around the world perceive and respond to various environmental issues, and we'll dig deeper into their experiences and motivations for taking action (or not taking action).

ESS syllabus - ESS- Environmental Systems and Societies

IA Overview The most important aspect of the environmental systems and societies course is hands-on work in the laboratory and/or out in the field. The syllabus not only directly requires the use of field techniques, but many components can only be covered effectively through this approach.

environmental systems and societies assessments

Although the ESS course requires the study of environmental systems and societies at a range of scales, from local to global, the teaching of the course should be firmly grounded in the local environment. The syllabus contains many references to "local examples", and fieldwork may be based on local ecosystems.

Environmental systems and societies guide

Through studying environmental systems and societies (ES&S) students will be provided with a coherent perspective of the interrelationships between environmental systems and societies; one that enables them to adopt an informed personal response to the wide range of pressing environmental issues that they will inevitably come to face. The teaching approach is such that students are allowed to evaluate the scientific, ethical and socio-political aspects of issues.
