Hi everyone.... I have a 2004 FB EFI. In the last 3 weeks I have noticed that the engine check light comes on every once in a while and then goes off. It initializes fine when I turn on the bike to start. It comes on at various times and I see no pattern to it. Then it will just go out again. I...

Check engine light on then off | V-Twin Forum

Change the thermostat, and bleed the cooling system or air. It does not need to be hot, and there are little bleeders on the engine, one is near the water outlet, it has a nut and a screw in the middle of it open it up, and pour coolant in the radiator, and watch for air and coolant to come out of the bleeder, and when all the air seems to be gone, close the screw. Need to hold the nut while loosening ...

Harley-Davidson engine timeline - Wikipedia

Engine or Oil light ? Does it flash on and off like a bounce or does it come on and stay on a while? If it is an oil light and it flashes or bounces, the connection to the oil pressure sender is probably loose, check the connection near the oil pump. If it is an(Engine light ?) you're on your own, my bikes have all been older than yours.

This spring on the first ride I get the "check engine" and "check coolant" lights both coming on and staying on. The oil and coolant levels are at full warm and cold. No strange sounds or stalling. This is a 2015 Tri-Glide, any ideas? Thanks in advance! Aj

Ideas Why "Check Engine and Check Coolant Lights Come On ...

Seeing your Touring model's check-engine light come on can give you a bad feeling in the pit your stomach, but it's not always going to be a worst-case scenario. It's also a pretty simple process to check and see what exactly is going wrong with your Hog. Your Harley-Davidson has an onboard diagnostic system that not only gives you the code, but breaks it down into categories so you'll ...
