assault by fire, close combat, and counterattack.

Increasing Small Arms Lethality in Afghanistan: Taking ...

FREDERICKSBURG, Va. — A slew of new weapons that will increase the lethality of troops are coming down the pipeline, according to Army officials. The systems — which include everything from the next-generation squad weapon to machine guns — are within sight, said Lt. Col. Steven Power, the Army's product manager for individual weapons.

New Army Small Arms to Boost Soldier Lethality

There are several ways to extend the lethality of the infantry. A more effective 5.56-mm bullet can be designed which provides enhanced terminal performance out to 500 meters. A better option to increase incapacitation is to adopt a larger caliber cartridge, which will function using components of the M16/M4.

Has anyone taken a look at the paper "Increasing Small Arms Lethality in Afghanistan: Taking Back the Infantry Half-Kilometer" by MAJ Thomas P. Ehrhart? From what I have heard it has caused something of a stir within the US Army. The debate over replacing US infantry weapons and marksmanship training has gone on for a little, but here someone has finally put it into a serious thesis.
