Background: In 2004, the health system in Iran initiated an organizational reform aiming to increase the autonomy of teaching hospitals and make them more decentralized. The policy led to the formation of a board of trustees in each hospital and significant modifications in hospitals' financing. Since the reform aimed to improve its predecessor policy (implementation of hospital autonomy ...

The experience of implementing the board of trustees ...

Model We used the following matrix form model: $Y_{it} = \beta X_{it} + u_{it} \quad (1)$. Where Y_{it} is the dependent variable and shows the level of health in the time of t and in the country of i . In general, many indicators, such as quality of life, life expectancy, health adjusted life expectancy, infant mortality rate, and maternal mortality rate, can be used in order to show the health status.

Vascular surgery is a constantly evolving specialty, and evidence-based care is a rapidly moving target. Treatment of vascular disease has changed dramatically over the 24 years since the North American Symptomatic Carotid Endarterectomy Trial (NASCET), 1 the earliest clinical trial referenced in this chapter, was published. Although new medications, procedures, and strategies have greatly ...
