In 18.100B it is customary to cover Chapters 1-7 in Rudin's book. Experience shows that this requires careful planning especially since Chapter 2 is quite condensed. These notes include solutions of Exercises 23-26, Chapter 2 because these help in understanding the abstract compactness notion in 2.32, and makes it more useful in analysis.

In 1995, Peter Weir was looking for his next project but found every script that crossed his desk to be "either predictable or derivative" (Weinraub). Then, a special project caught his interest - Andrew Niccol's screenplay for The Truman Show, via producer Scott Rudin (who bought the screenplay on spec for over \$1 million). Rudin thought that Weir would be perfect to direct the film because of ...

That's why I can't get along with Rudin's analysis. He kills your mathematical creativity. When you read Rudin's mathematical analysis, you learn the theory, but you don't learn to apply the theory you have learned in real situation problems. That's my problem with Rudin and books of that sort.
