- The air injection system on the 77-82 uses an air pump and is not affected by the installation of the Weber Carb.
- 83 and later models use a pulse air injection system. To use this with the Weber Carb you will have to drill two holes in the air filter top and place the two white plastic fittings in the air filter top.

The Magneti Marelli-Weber IAW is a fuel injection and ignition control system. The control system evaluates signals from different sensors and adjusts fuel metering and ignition accordingly. The IAW is a multi-point system with separate injectors for each cylinder, these are controlled sequentially.

Operation - Magneti Marelli IAW M T M IAW AGNETI ARELLI

Weber has provided several different computer types to Ducati during their 15-year history with fuel injection. The basic operations are the same for all types, all are open loop (i.e. there is no lambda probe in the exhaust to automatically correct for changes away from optimum fuel air mixtures).
